

THE EMPRESS EXPRESS

VOLUME XVII, No. 50

EMPRESS, ALTA. THURSDAY, May 15, 1930

Price: \$2.00 Per Year.

United Church

Church School, 10:20 a.m.
Public Worship, 11:30 a.m.
Subject: "How to make Life Count for God."

There will be Holy Communion at:
Leland, 3:00 p.m.
Social Plains, 7:30 p.m.

The Lord's Supper will be administered at Leland and Social Plains only.

"The church service is not a political convention; do not send a delegate, come and bring your family with you."

Rev. Geo. A. Smith, Minister.

Hospital Saturday

Celebrate Annual Hospital Day by patronizing the Tea (under the auspices of the Empress Hospital) at the home of Mrs. McGill, Saturday, May 17, at 4 p.m., and through the evening.

Castle Combe Mission

11 a.m., Mayfield Hall,
12:00 o'clock, Sunday School.
3 p.m., Washfleet School.
7 p.m., Wesley School.
— R. A. Cameron, Student, Missionary United Church.

First Baseball Game Of The Season

The first baseball game of the season was played on the local diamond on Wednesday, May 14. Bindloss furnished the opposition and gathered freely of runs in the first innings. After this sequence the play was of a more even nature, and although the home team managed to bring in some scores, Bindloss also augmented their total and maintained a comfortable lead until the finish of the game.

While the showing of the home team was not all that could be desired, fans were optimistic of future development. Both teams were largely made up of young players.

After the game a meeting of delegates of Ananda Valley, Bindloss and Empress took place in the Empress hotel. A three team league was formed and a schedule of twelve Wednesday afternoon games is to be drawn up. The next game will be held at Bindloss on May 21, when Bindloss will be at home to Empress.

Train Times Remain Same

Official changes in time tables of Can. Pac. Ry. takes place on May 18. There are no changes in times of departures or arrivals of local trains from or to Empress.

Suffers Burns and Has Home Destroyed When Lighting Kitchen Fire With Gasoline

Charles Harvey, a farmer of the Alaskan district, had his home destroyed and suffered severe bodily injury from fire when he tried to light a fire in the kitchen stove with the aid of coal oil mixed with gasoline. He was found unconscious in the horse trough by a neighbor, having crawled to the trough and thrown himself in.

Hon. Geo. Handley will be the speaker at Bindloss on Friday evening, May 10.

DENTIST

Dr. DOWLER

Easter Examinations

Report of Junior Intermediate Room, Grades III, IV and V:

Grade III:

Lillian Weathrup, 84.8
Anna Cameron, 83
Florence McNeil, 75.7
Jack Longmuir, 70.6
Frank Highmower, 68
John Boleweck, 67
Dorothy McCune 65.1
Martha Morrison, 63
Joe Orend, 62.3
Edgar Turner, 56.9
Selma Lacy, 52.9
John Orend and Jean Moore, not graded.

Grade IV:

Harvey Boswell, 82
Walter Harsch, 77
Robert Miller 74.8
Dorothy Stubbington, 69.4
Mary Hopkins 67.9
Dorothy Nickels, 64
Edwin Pawlak, 63.2
Betty Burke, 61
Violet Dark, 61.6
Roy Horn, 61.6
Phyllis Hopkins, not graded.

Grade V:

Iona Alton, 79.9
Marjorie Hurlburt, 77.8
Maxie Pawlak, 75.5
Bill Crocker, 72.3
Mabel Langmuir, 68
Harold Fraser, 64.9
Walter Highmower, 63
John McCune, 61.7
Corinne MacPherson, 61.7
Wilfred Stubbington, 58.4
Irene Durr, 47.7
Arthur Durr, 47.5
Robert Orend, not graded.

M. A. Hutchinson, teacher.

Report of Cream Prices

For the week ending May 3rd, 1930, the following prices were reported paid by creameries per pound of butterfat, in several grades of cream, and at the points shown:
Jasper Dairy, special grade, 32¢; No. 2 30¢; No. 3 27¢.
Minimum: Special grade, 30¢; No. 1 28¢; No. 2 25¢.

Baseball practice is being well patronized in attendance by the high school boys and the senior ball team should eventually benefit by the development of this budding talent.

Second Fortnightly

Govt. Crop Report

Dept. of Agriculture, Province of Alberta, May 10

Reports from numerous correspondents throughout the Province indicate that 95 per cent of the wheat seeding is completed. Much of the wheat is above ground; and while growth is slow due to the continued cool weather, germination is uniform and the crop of excellent color.

From 35 to 40 p.c. of oats and barley is already seeded and 70 per cent of sugar beets. The opinion generally expressed is that the wheat acreage is practically the same as that of last year, while the area devoted to coarse grains shows an increase of from 10 to 15 per cent.

Moisture is sufficient for immediate needs in all parts of the province. Those areas, however, which suffered severely from drought in 1929 will require continued and abundant rainfall if good yields are to be obtained. Weather during the past fortnight has been cool with frequent showers in which all parts of the province have shared.

The season of 1929 did not induce satisfactory germination of wild oats and other weed seeds; consequently an unusually large number of weeds are growing this season. In some districts seeding has been delayed in order to destroy these weeds before the grain is sown.

In the central and northern parts of the province pasture and hay is growing slowly and considerable killing of sweet clover is reported. Alfalfa in the irrigated districts is making rapid progress. The condition of pasture in the range areas is reported to be satisfactory and live stock is in reasonable good condition.

All correspondents report ample labor supply.

Messrs. Childerhouse and Lynch, Staunton, petroleum engineers with the Texas Oil Co., have been working out from town the past few days.

Successful Flower

And Baking Sale

The local Auxiliary of the Women's Missionary Society wish to express their appreciation for the donations given to the Sale of Baking and for the splendid patronage given the Flower Sale and Tea and Sale of Baking on Saturday previous to Mother's Day. Despite the inclement weather the patronage was excellent, making this annual event a very pleasing and successful one.

Sunshine for Babies

The baby should spend a large part of his life outdoors in the fresh air and sunshine. The baby needs fresh air and sunshine in order to build up a strong and resistant body.

Not only are sunshine baths pleasant, but they bring to the baby something he needs. One definite good resulting from the sunshine is that the action of its rays upon the body of the baby prevents rickets.

Sun baths should be taken regularly each day, and, as the weather grows warmer, there should be taken out-of-doors rather than in front of the open window.

There is a right way to take sun baths, and this way must be followed or harm will result. On the first day the hands and feet are exposed for five minutes. Next day, the time is ten minutes, and five minutes a day are added until the bath lasts for an hour.

As the time increases so should there be an extension of the area of the body which is exposed to the sun. On the second day, expose the legs below the knees, then the whole leg; after that the abdomen, and, lastly, the chest, front and back. On the day week area is first exposed, the time of exposure is five minutes; and the period is increased five minutes each day for each part until the whole body is given an hour's sun bath daily.

The baby should not have his sun bath just before or after a meal. In the really hot weather, his sun bath should be before eleven or after three, so that he may not be exposed to the mid-day sun.

In addition to the good that comes directly in the sun's rays, there is no doubt the exposure of the body to the air—the air bath—is of benefit to the child.

Taking the sun bath out of doors or in front of the open window, gives the baby the benefits of both the sun and the air at the same time. The sunbather, worshipped the sun as a god. We today should appreciate and use the sunshine as a giver of health.

Accepts Call To United Church At Fincher Creek

Rev. N. W. Whitmore, Wainwright, has received and accepted a call from the official board of the Fincher Creek United Church, to become effective July 1st next, subject to the approval of the Conference Settlement Committee.

Large Party Leaves For Churchill On First Train Of Year

The Pas, Man.—Speeding into the north country carrying the vanguard of the army that will bring Churchill to completion this summer, the first train of the season left for the northerly port April 12. Passengers on board included Premier John Bracken, prominent railway officials, and prospectives tenders on the 2-500,000 bushel elevator to be built this summer. George Kydd, resident engineer at Churchill, with a group of key men also accompanied the party.

C. D. Howe, Port Arthur, designer of the proposed modern elevator, is in charge of the prospective tenderers. Tenders must be presented to the Federal Government before May 13 and work will start almost immediately after this date.

Following in the wake of the Churchill special the private car of Major J. G. MacLachlan, district engineer of the Hudson Bay Railway, also headed for Churchill, carried Dr. L. D. Livingstone, Department of the Interior's most northerly physician in Canada, and Dr. L. J. Weeks, of the geological survey.

From the northern port they will mush northwards toward Chesterfield Inlet and Baker Lake, where Dr. Livingstone plans extensive medical work among the Eskimos.

Premier Bracken, commenting upon the significance of the trip, declared this summer would see final preparations for a new era in Western Canada made.

H. A. Dixon, chief engineer, western lines, Canadian National Railways official, stated Churchill will be ready to ship next year's crop from the new inland seaport.

C. D. Howe, who will supervise the erection of the elevator, said the building would be completed by September of next year and a dock ready for ocean going vessels. It is expected five hundred men will be employed on the new elevator with an additional fifteen hundred rushing through the summer's work on the dock and in dredging.

Duchess Takes Up Aviation
London, England.—The Duchess of Bedford, who is 65 and an aviation enthusiast, made her first solo flight in her own baby "plane at her home, Woburn Abbey, Bedfordshire.

Will Attend Passion Play
Oberammergau.—Prime Minister Ramsay MacDonald, of England, has ordered tickets for himself and family for the Passion Play to be presented here this summer.

Say Wheat Acreage Will Not Show Much Decrease This Year

Winnipeg, Man.—Acreage of wheat on the prairies of the west will not show a decrease this year, according to indications at present. This is the verdict of farm authorities in Manitoba, Saskatchewan and Alberta, as expressed to the Canadian Press. Spring rains, however, are characterized as a generally necessary means of replacing depleted sub-soil moisture.

Forecasts of ultimately-decreased wheat-areas in the west are not unfounded, nevertheless, by the opinions that acreage will remain "much the same." It is conceded on all sides that weather during the remainder of April, if adverse, may quite reasonably affect a cut in the expanse of territory seeded to wheat.

While pleas for acreage cuts have been heard in several parts of Saskatchewan the wheat pool, which controls more than one-half of the province's wheat yield and as large a proportion of the entire prairie crop, has made no such move to restrict sowing. Pool officials have gone no farther than to advise against sowing of land that is not at least in fair condition. They have

National Fuel Policy

**Matter Brought Up In House Of
Commons In a Series Of
Questions**

Ottawa.—The question of a national fuel policy for Canada is being brought up in the House of Commons in a series of questions propounded by T. L. Church, (Cons., Toronto Northwest). Mr. Church enquired:

Practice Of Inoculating Seed Of Various Legumes Has Been Found To Be Beneficial

During the past few years practically all Ontario farmers have come to recognize the value of inoculating the seed of the various legumes when they are being grown on land which has not previously been used for these crops or on land where their cultivation has been hoped for a period of years. This practice has proven a good one and is now used in every progressive agricultural culture of the world, but the discovery of a proper method of getting the inoculation or culture to the farmer was not done in a day and the history is rather interesting.

The first efforts in this direction were made in Germany where samples of the soil which had been used for growing the legumes was transported to the virgin soil and there spread around to insure the presence of the bacteria. The disadvantages of this method are obvious and a commercial company sold a large number of prepared cultures which were found to be valueless. Agricultural colleges and experiment stations in the various countries worked on the problem for a number of years and the Department at Washington believed they had a successful method of growing and sending out the bacterial cultures, but it proved a failure.

It remained for the Department of Bacteriology at the University of Wisconsin to solve the problem. The proper method and the culture advised was soon adopted as the one best suited for the work. The familiar bottle of alfalfa seed and a white substance is the outgrowth of this discovery and the bacteria on this culture will live almost indefinitely. Each legume has its own particular culture and the one that is supplied for alfalfa is of no use for inoculating red clover and vice versa. Since the discovery, the Department of Bacteriology has supplied something over 100,000 cultures to farmers requesting them at a nominal charge of fifty cents.

A question frequently asked is when is inoculation required and for what crops? The common crops requiring inoculation are alfalfa, red clover, sweet clover, peas, field beans and soy beans. Inoculation should be practiced where the crop is to be grown on soil that has never been produced that particular crop and in general if it has not produced a good yield of the said crop within the past four or five years.

The Department have not claimed unfailing increases after the use of the inoculant. It has been generally assumed that in about seventy cases out of every hundred there will be a substantial increase and reports have shown that in the case of the other thirty per cent the bacteria were probably already in the soil and the inoculation thus rendered unnecessary.

It is interesting to note that rich soils which are very high in bacteria will often produce good crops of legumes for the first time without inoculation. The reason for this is that the bacteria used in inoculating have as their function the converting of the nitrogen of the air into a form which the plants can use and in nitrogen rich soils the soil nitrogen is used when the bacteria are present, thus seriously depleting the soil but not giving any noticeable effect on the plant.

"Mother, isn't your hair permanently waved?"

"My dear, what makes you ask such a thing?"

"I've been thinking. Why can't I have my neck permanently waved?"

A Dutch scientist proposed to attempt to create rain by taking quantities of pulverized ice above the clouds in aeroplanes and letting it drop.

"I sent a letter to have my character told from my handwriting."

"What was the result?"

"Your letter shows that spelling is not your strong point." — Buen Humor, Madrid.

W. N. U. 1533

New Grain Act

New Act is a Consolidation and Revision of the Old Measures Canada's new grain act was up for consideration by the committee of the House of Commons on agriculture and colonization. The new act is a consolidation and revision of the old measure but involves no change in the operation of the legislation except on minor points.

Col. C. M. Biggar, K.C., who drafted the new act explained the chief difficulty with the old act was that the sections were badly arranged and occasionally inconsistent. With regard to some provisions there was doubt as to their constitutional validity, he said.

In drafting the new act, Col. Biggar stated, it was necessary to find new constitutional bases for some sections in order to ensure their validity. The sections are arranged differently and simplified, he declared.

Clover a Honey Maker

Figures Show It Leads As Source Of Nectar

Clover and honey have always been intimately associated and with good reason. Figures supplied by the Dominion Department of Agriculture show that clover leads as a source of nectar supplying the honey bee. The figures for 40 days of fruit blooms supply nectar 26 days of the year, the dandelion for 23 days, the raspberry and goldenrod each for 20 days, with pussy willow starting the season with a 13 day supply.

Winnipeg Newspaper Union

(By Anabelle Worthington)

The finest after-dinner speaker we ever heard only said, "Walter, give me the bill."

It's typically sports! A charming womanly type that adapts itself to all the season's new fabrics.

Several dresses are made from this 8336 No. 2841 and each one appears entirely different.

It is sketched in wool jersey in chartreuse green, with dash of soft blue tie and sunbeams belt. Applied neckband gives smart finish to becoming collarless V-neckline.

It comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Orange-yeared or violet blue silk crepe is effective to complete ensemble.

Modern Poultry Research

International Standardization Of Poultry Industry At London Congress

The poultry industry, perhaps more than any other, is becoming standardized in a universal sense through instrumentalization of the World's Poultry Science Association. This organization will this year bring together at the World's Poultry Congress, seriously minded men and women from many countries who are concerned with the development of the poultry industry and incidentally with the promoting of international friendship.

The fourth congress which takes place at the Crystal Palace, in Old London, England, in July this year, promises to exceed any of the previous ones. At that meeting there will be pooled the best and most recent knowledge concerning the various aspects of the poultry industry in all parts of the world. Modern poultry research, education and economics will be revealed through papers and discussions and national exhibits from half a hundred countries.

Displays, on an international basis, of purified poultry will bring out the best that has been achieved in poultry improvement. Commercial exhibits at that great show will reveal the progress of the industry and in providing the requirements of the poultry industry, and of carrying it on in a profitable way.

Peasants Exempted From Farm Taxation

Soviets Wish To Encourage Them To Stay On Land

A number of important exemptions for peasants on collective farms have been decided upon by the Communist party. The object is to encourage peasants to stay on such farms and also to promote the growth of these institutions.

Freedom from taxation for two years on all cattle and horses. An extension of a credit of \$250,000,000 to promote collective farm organizations.

Postponement of all outstanding debts of collective farmers until the end of the harvest season.

Cancellation of all fines imposed upon such farmers for failure to carry out terms of the government grain collecting campaign.

Reduction of the total agricultural tax for the fiscal year 1930-31.

Proves Planet Exists A photograph taken at the Helio-observatory confirmed, it was stated, existence of the Trans-Neptunian planet recently discovered by the Lowell Observatory at Flagstaff, Arizona.

Photographs of the planet were taken March 16, 24 and 27, the body appearing on the sensitive plates after an hour's exposure in each case.

Serious Problem For Cattle Committees

Herdsmen Said To Be Resorting To Knife and Needle For Show Ring Purposes

The Farmers' Advocate says: Cattle committees who outline the policy and lay down the rules which govern exhibitions in Canada are giving earnest thought and consideration to the serious problem of detecting and barring "doctored" cattle. The large exhibitors, both East and West, realize that something must be done to prevent the public being hoaxed by super-expert herdsmen who are able to use knife and needle in beautifying their cattle. It is a practice that will be neither condoned nor permitted and the fair boards are acting wisely in their attempt to ban the doctored animal and the exhibitor who offers such animals for competition.

One suggestion is that all cattle be inspected by a veterinarian before entering the ring. This entails much unnecessary work, and any animal found tampered with would simply be led back into the stable to be presented at future shows or exhibitions held elsewhere. It becomes necessary to inspect only a few cattle, the champions and the few reserve champions, and the fear of exposure after winning such honors would deter any exhibitor from going to undue lengths in treating or preparing his animals for the show-ring.

It is not the cattle that win third, fourth or fifth place in a class, or outside the prize money altogether, about which a fair board needs to worry. Not one in a hundred of them receive more than ordinary tending. It is the cattle that are winning high honors in the show-rings of Canada and the United States that need watching. Neither do we wish to import all the cattle that win championships are dishonestly altered or treated. Many breeders and exhibitors would condone such practices; but it is not the cattle that are resorting to the knife and the needle, and fair boards cannot overlook the fact.

World Curtail Production

Effort Made To Reduce Spring Wheat Planting In United States

Two United States government preachers of the gospel of curtailed production as the only real salvation of wheat farmers made ready to preach to the farmers of the spring wheat area of the northwest in a last-minute effort to forestall the planting of wheat on at least 2,000,000 acres.

The two men were Dr. John L. Coulter, chief economist of the tariff commission, and James Howard, federal farm board representative and former president of the National Farmers Bureau Federation.

Their final plan for the intensive campaign by which they hope to reduce spring wheat acreage by 10 per cent, were made in conference recently with Alexander Legge, president of the Farm Board.

It's typically sports! A charming womanly type that adapts itself to all the season's new fabrics.

State Of Canadian Business Is Fair In Comparison With Conditions In Other Countries

Delegation To Investigate Modern Farm Machinery

Men From Britain Visiting Canada and United States

Commissioned by the British Government to spend some weeks in both United States and Canada visiting modern farm machinery and labor-saving devices on the farm, J. E. Newman, of the institute of agricultural engineering, Oxford University; Thomas Baxter, ex-president of the National Farmers' Union of England, and G. Clarke, representing labor organizations, were in Montreal, recently, on their way to Ottawa. The delegation was met by F. W. Walsh, superintendent of agriculture of the Canadian National Railways, who extended to them the facilities of the department for assisting them in their investigations.

The members of the delegation expect they will spend the greater part of their time in the United States, investigating very thoroughly the use of labor-saving machinery in connection with grain and root growing and will visit particularly the states of Kansas and Nebraska. Later on they hope to visit Western Canada.

In Ottawa they interviewed Sir William Clarke, British high commissioner to Canada, and heads of the various branches of the federal department of agriculture. A similar delegation toured Canada in the fall of 1928, and secured much valuable information.

A Good Slogan

"An Acre Of Alfalfa For Every Cow"

"An acre of alfalfa for every cow" is a slogan adopted in many districts where live stock is kept, and with modification to suit local conditions it is being used by the Dominion Department of Agriculture. With the short crops and difficult seasonal conditions of 1928 and 1929, the need of adequate provision with respect to fodder crops becomes more apparent. It is well the application of this slogan to alfalfa, or suitable clover or hay crops go far to meet the urgency of the present situation, but it would also provide a useful and profitable rotation medium for keeping soil fertile to production of grain and assist in weed control. This scale of planting not only provides adequate pasturage but allows a surplus for feeding to other farm animals and often provides a carry-over of hay to a lean year.

More Milk Is Used

Consumption Per Capita Has Practically Doubled In Canada

During the past eight years domestic milk consumption per capita has practically doubled in Canada. This is due to the fact that the Dominion Department of Agriculture attributes this increase to the growing demand of the sweet milk trade and to increasing popularity of ice-cream. Canada's exports of dairy products have declined materially, and this has been due in part to the increasing domestic consumption and in part to the large number of high quality United States buyers and gone out of the country. In this connection it is noted that there were approximately 100,000 fewer good milk cows in Canada in 1928 than there were in 1927. Canadian farmers are realizing the economic danger of the situation, however, and few sales of high grade milk cows are now reported.

Sounds Like Magic

Almost magical is the skill which was used to alter a noted restaurant in London while business was carried on as usual. Now by means of an ingenious device, the Empire Restaurant, each seating 200 diners, will become one. At the touch of a switch, a vanishing wall 66 feet long, 15 feet high and 15 tons in weight, will, complete with decorations, lighting and doors sink through the floor.

Western Aircraft Limited, McDonald Aircraft Industry, a subsidiary of the Macdonald Bros. Sheet Metal and Roofing Limited of Winnipeg, is the newest addition to the Winnipeg's aircraft industry. The company will manufacture EDO gliders for the whole of Canada.

The cougar, while very aggressive among the lower animals, exhibits an intensive fear of mankind.

Information Wanted Mrs. Newlived: "Oh, I wish these recipes would be more definite."

Mr. Newlived: "What's the difficulty, my dear?"

Mr. Newlived: "Well, this one tells how to use up old potatoes, but does not say how old the potatoes must be."

The greatest earthquake area in the world is said to be in Italy.

"I hear your brother has married his deceased wife's sister!"

"Yes, he wanted another wife, but not another mother-in-law."—Karikatur, Oslo.

Whilst the state of Canadian business is uneven and may be regarded as disappointing compared with that of a year or two ago, it is fair in relation to world conditions, declares the Commercial and Financial Review of the Canadian Bank of Commerce. Canada's unemployment problem, though by no means negligible, is not nearly so acute as in some of the older countries, the letter points out.

During the month of March business conditions showed a gradual accession in industrial and construction operations, which tended to offset unsettlement in other branches of commerce, says the bank's letter.

"We have mentioned before that the reduction in agricultural purchasing power would weigh heavily on the economic structure and this has proved to be the case. Until the farming community experiences favorable weather and market conditions, business as a whole will continue on a smaller scale than in the year preceding years. However, Canada is fortunate that capital expenditures on development projects continue to be large volume. In the matter of European trade the bank's letter remarks that with the prospect of further substantial purchases of Canadian goods and opportunities as an export market for those Canadian commodities which are not securing their share owing to Canada's increased productive power.

Prairie Cattle For Peace River

Cannot Procure Right Type Of Cattle In British Columbia

The cattle suitable for sale on easy terms to settlers in the Peace River district have been found on prairies and will be purchased there shortly, John William Atkinson, minister of agriculture, announced on his return to Victoria from a prairie tour. "There may be some surprise that we are not securing these cattle in British Columbia for our northern settlers," said Mr. Atkinson. "The Peace River country is a new type of cattle which these people must have for their conditions. That is required is a genuine prairie animal. Our fine dairy cows would not endure the cold there. It is necessary therefore to secure such cows as are to be found on the prairies only at this time."

Mr. Atkinson proposes to send experts of his department to the prairie shortly to select the animals which will be moved north in May to Peace River people. Probably about 150 animals will be sent this spring.

Ten Thousand Stings By Mail

Now Possible To Send Package Of Bees By Mail

With the improved technique which has been developed for the handling of package bees it is now possible to send them by mail, and the beekeepers of the Dominion Department of Agriculture find that very satisfactory results are obtainable. The package bees are sent in package bees to replenish weakened colonies and to establish new ones. The bee package is a wire-covered wooden frame work, usually containing two pounds of live bees. There are some five thousand bees to a pound. A shipment by mail is now possible and should a package of bees become broken open in transit ten thousand stings is the potential result.

Information Wanted Mrs. Newlived: "Oh, I wish these recipes would be more definite."

Mr. Newlived: "What's the difficulty, my dear?"

Mr. Newlived: "Well, this one tells how to use up old potatoes, but does not say how old the potatoes must be."

The greatest earthquake area in the world is said to be in Italy.

1. *Staphylococcus aureus* (100%)

Stops a Cough In One Night

A cough may be Catarrh with a dry tickling in the throat. It may be accompanied by partial stoppage of the nostrils and shortness of breath. Often there is a gagging in the throat, and every cough tears and hurts.

Coughs have a hundred different causes, yours may be due to any of the following:

Asthma Exposed Inflamed Throat
Exposure Enlarged Tonsils Pneumonia
Inflammation of the Lungs
Stomach Disorders Croup
It's simply wonderful to think how quickly a bad throat or catarrh can be helped with Catarrhose. Its rich balsamic vapor is carried along with the breath to the inflamed recesses of the lungs, bronchial tubes and chest, making it impossible for the germ of Catarrh to live. The soreness in the chest is at once allayed—phlegm is loosened and ejected from the throat, old standing coughs are removed.

REMEMBER THIS, you breathe Catarrhose and it will alleviate coughs, colds, catarrhs, whooping cough, large size, guaranteed, costs \$1.00, and lasts twice as long as smaller sizes, 25c, and 50c. Beware of imitations and insist on "CATARRHOSE".

WORLD HAPPENINGS BRIEFLY TOLD

Activity in civil aviation in Canada doubled during 1929 according to figures made public at the National Defense Department.

On its annual arctic cruise this summer, the S.S. Benbow, ex. did endeavor to reach Melville Island, situated 360 miles beyond the most westerly point yet reached by steamship.

Prominent railroad, pioneer of the West, and veteran of the riot rebellion, W. H. Bennett, 85, died recently at his home in Winnipeg. He was captured and held prisoner at Batavia, Siam.

Mr. J. H. Montagu Norman was re-elected governor of the Bank of England. This makes the eleventh year in which he will fill the office of governor to which he was first elected in 1920.

J. R. Nesbitt, of Shovel Lake, prominent dairyman, has been granted an honorary diploma from Manitoba Agricultural College. The honor follows the established custom of honoring each year one outstanding man in Manitoba's agriculture.

In a motion adopted by city council, of Toronto, police commissioners have been asked to prohibit the operation of a "bad and doubtful debt" collecting car, whose driver, clad in a brilliant uniform, with a gaily decorated car parked in front of homes of debtors, drew a good deal of unfavorable attention.

Ralph Hall and Robert D. James, of Vancouver, students at the University of British Columbia, have been awarded mathematical scholarships, valued at \$1,000 each, by the University of Chicago. These are the first awards of the institution to Canadian students who plan to specialize in mathematics.

Because "the results were not very satisfactory," there will be no repetition this year of the provincial government's placing British trainees on Ontario farms. Hon. John S. Martin, minister of agriculture, has stated. Any trainees that do come, he added, will have to come under the United Church settlement scheme, the Dominion government or the railway companies.

Many Uses For Spruce
The wood of all Canadian spruces is tasteless and odorless, making it valuable for food containers. It is also in great demand for musical instruments, principally for organ pipes, piano sounding boards, violin backs, etc.

Inquiry by experts of the Mayo Foundation indicates that rheumatic persons can "sense" the approach of rain.

Dandruff

You needn't be bald. Minard's Killo Dandruff, which is a healthy falling hair, stimulates new growth and adds a healthy glow. Rub into scalp with finger tips, four times a week.

W. N. U. 1833

London Woman Fills Important Position

Made Chairman Of Central Public Health Committee

A woman has been chosen at the head of a vast public undertaking of vital importance to thousands of Londoners.

On April 1, the old Boards of Guardians will have ceased to exist. Their functions, as far as the County of London is concerned, will be exercised by the London County Council. A new committee called the Central Public Health Committee will be responsible for all the infirmaries, hospitals and institutions previously administered by the Metropolitan Asylums Board, and also for the public ambulance service now administered by the London Fire Brigade and the M.A.B.

The engineers of this committee, which will have the health and welfare of thousands of Londoners under its control, is Dr. Florence Barrie Lambert, a well-known member of the London County Council, and the chairman of the old Public Health Committee, becomes under the new regime a sub-committee of the Central Committee.

It is a colossal job to place upon the shoulders of a woman. It involves the care of the necessities of a city of millions.

An Exciting Pursuit

Cave Exploration Has Added Much To World Knowledge

An archaeologist says there are numbers of caves yet to be explored in England with good prospects of "finds" throwing light on prehistoric periods. In Derbyshire at least a dozen caves have this summer been explored for the first time. There were human jaws and other bones, remains of cave bears, and antlers of the giant elk, a creature from ten to thirteen feet high, which is not to be met with in Derbyshire nowadays. Cave exploration is an exciting pursuit, and its results in various parts of the world have added a great deal to the knowledge of early man and the beasts he had to contend with.

(By Annette Worthington)

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble.

Price, 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Passenger Air Service
Air Mail Service Will Now Take Passengers Over Frontier

Western Canada's new passenger air service across the prairies was officially inaugurated recently by the air mail contractors, Western Canadian Airways, with the issue of an official scale of transportation rates from Winnipeg to western cities now served by the air mail planes.

The new rates for carrying passengers over the sky route across the western plains are approximately the railway fare plus one-half. J. A. McDougall, secretary of Western Canadian Airways, said last night, and officials of the company believe that this will not be long before the travelling public will avail themselves of the new and swift means of transportation—Free Press.

Will Continue Exhibits

Saskatchewan, Manitoba and Alberta will continue their exhibits at the World's Poultry Congress to be held in London, England, next July. The exhibit will occupy a frontage of 36 feet and will be the largest of the provincial exhibits.

Strengthening Butter Boxes
Recent tests on butter boxes at the Forest Products Laboratories, Department of the Interior, showed that one wire applied around the centre of the box doubles its strength.

Middle-age is the period when you know a dozen dandy ways to regain vim and vigour if you only had time.

Horses Do a Half More Work When Clipped

Clipped horses work easier. Do not waste their strength away. Groomed in a quarter of the time.

Experiment a Success

Complete Newspaper Page Sent By Radio From San Francisco To

The complete front page of a newspaper has been transmitted across the country by radio for the first time.

Giving the present a peep into what may be commonplace in the future, engineers of the General Electric Company at Schenectady, N. Y., reported that successful experimental transmission of the front page of the San Francisco Call-Bulletin three hours after it had left the press. It was reproduced in full size in the laboratory of a new type automatic carbon receiver, connected to short wave receiving equipment actuated by signals originating 2,000 miles away.

The engineers did not hesitate to forecast many possibilities for improvement in facsimile transmission, which, while still in a highly experimental stage, gave an indication that some day radio may be delivering a large part of business mail and may also bring daily newspapers directly into the home.

Appears In Real Life

Forgetful Professor Alfred Luncheon and Forgets To Attend

Professor Alfred A. Michelson, distinguished University of Chicago scientist, gave a luncheon for Dr. Leo DeForest, radio tube inventor, and forgot to attend it. It was a gathering of famous scientists at the Quadrangle club, assembled at the invitation of Professor Michelson to honor Dr. DeForest. The distinguished guests waited and waited. The soup finally came. Finally Dr. Henry Gale, of the University of Chicago physics department, stepped in as substitute host and the luncheon went on.

Heart and Nerves

Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes: "Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

MILBURN'S HEART NERVE PILLS

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve only temporarily, but the heart and are very dangerous. They are depressing and only temporary relief. The cause of the headache still remains within. The sure and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the irritation of the decayed and poisoned food matter, gently stimulate the liver, start the bile flowing and the bile-liver oils of the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pills.

Recipes For This Week

(By Betty Barclay)

VEAL A LA KING

2 pounds lean veal.
1 cup butter.
6 carrots.
2 onions.
1 bay leaf.
4 cloves.
1 quart cream.
1 sweet pepper.
1 can mushrooms.
1 can sliced peas.
2 cans noodles.

Two pounds of lean veal—trim off all fat and cut into cubes about an inch square. Brown slightly in 1/4 cup butter. Add water to cover well. Add 6 medium-sized carrots, 2 medium-sized onions cut up, 1 sweet pepper, 1 bay leaf, 4 cloves, and boil together until meat is tender. (Do not let water boil down—add enough to keep about 1 pint of liquid.) Add 1 quart of sweet cream which has previously been heated to boiling point, thickened as for gravy, and add one can mushrooms cut up, 1 can sliced peas. Salt to taste.

1 teaspoon paprika. Serve on chosen meat.

PANAMA SALAD

(Serves 4)

4 slices pineapple.
2 large oranges.
1/2 head lettuce.
4 Maracchino cherries.
1 green pepper.

Place slice of pineapple on bed of lettuce. Cut up the rest of the pineapple slice, to form a dome appearance. Cut a rosette of cherry and place on top of fruit sections. Rosette is made by cutting the cherry in six or eight sections leaving it joined at the tip. Two diamond-shaped pieces of green pepper are placed on each side of the salad, near the cherry. Serve with French dressing.

Canada's Oldest Men Dead

Within a period of less than three weeks death claimed the two oldest men in Ontario, and two of the oldest in Canada. James Wilson, 109-year-old negro, died at his home in Wend, Ont., and two weeks later, St. Joseph's hospital, Peterboro, James Hendley, of Peterboro County, died in his 109th year.

Art On Ocean Liners

Big Ships Are More Modern In Decoration Than Most Hotels

It is not only in speed that great steamships are setting new standards. Design in cabins and public rooms is changing quite as radically as in the engineering or in the streamlines of the vessels themselves. Modern art has stepped aboard the liner and made pre-war decorations look very smug and old-fashioned.

Advertising circulars are wont to characterize big ships as floating hotels, and in other days their saloons, smoking rooms and bars were modeled on hotel style. They went in for imposing copies of old masters, Louis XIV. furniture, Victorian cory corners and grand staircases.

Nowadays they are more modern than most hotels in their schemes of decoration. The "De France" when she was launched was the last word in modernity furnishings. The saloons and smoking rooms of a Swedish ship are one of the most modern pieces of public decoration. A new liner, the "Empress of Britain," launched on the Clyde late in May, will display the handiwork of several famous artists.

Making New Geological Map

Area North Of Churchill To Be Surveyed This Summer

Dr. Ladlow J. Weeks, of the geological survey of the Department of Mines will "mush" from Mile 372, temporary end of steel of the Hudson Bay railway, to the north end of the west coast of Hudson Bay. Mile Lake Bay is some 350 to 400 miles north of Churchill, and Dr. Weeks, assisted by J. P. Kidd, of Vancouver, will carry out the important work of preparing a geological map of the district. Three Eskimos complete the party.

Dr. Weeks has left Ottawa for the Mackenzie, and is due to return to civilization in the late autumn on the "Lady Logan," a staunch little forty-foot craft.

Carloads Of Horses

Animals Being Assembled At Moose Jaw For Spring Work

Under the management of the Saskatchewan Co-operative Live Stock Producers, Limited, the horse marketing section of that organization is undertaking to assemble carloads of horses at the Moose Jaw yards in readiness for spring work. With the aim of improving the condition of these horses they will be fed for a few weeks before offered for sale. This affords buyers an opportunity to view the yards and select their teams.

There are many gasoline saving devices on the market. A pair of comfortable shoes is the best.

An old temple bell has been restored to Japan by a Swiss museum as a token of loyalty to the League.

NO MORE ECZEMA Itching Ends in 1 Minute

"Hid eruptions for months. Single application of this ointment cured me in 1 minute. I have never had a relapse since. I have tried many other ointments for eczema, but none have done so well as this. I have tried many other ointments for eczema, but none have done so well as this."

COUGHS & COLDS
Dissolve in water and inhale on cough. It relieves coughs and colds as quickly as it relieves itching. It is the only relief for the cold.

SOOTHING
Practical for home use every day. It relieves all kinds of coughs, colds, and sore throats. It is the only relief for the cold.

Completes Long Air Journey

Bishop Geddes Makes Trip From

Covering the two thousand miles from Aklavik, on the Arctic ocean, to Edmonton, in 17 hours of actual flying time, His Lordship Bishop W. A. Geddes completed a trip March 30 which would have taken ten weeks of ordinary winter travel. In open water, the journey by steamboat would have lasted three weeks.

The bishop, accompanied by Mrs. Geddes, left Aklavik in a Commercial Airways aeroplane piloted by Capt. W. R. (Wop) May. It was 35 hours zero when the machine left Aklavik. This was ordinary winter weather at that point, although a bad storm was experienced the week before.

On over Fort McMurray, Arctic River, Fort Good Hope, the machine passed in company with the first mail trip to the Arctic before the ice breaks up. When Fort Norman was reached for the end of the first day's flying, it was 40 above zero after a heavy rain had fallen.

On the second day, Fort Simpson, Hay River, and Fort Resolution were reached, while the second night was spent at Fort Chipewyan. Pilot May went on to Fort McMurray and Pilot Glyn Roberts called at Chipewyan and picked up Bishop and Mrs. Geddes whom he brought on to Edmonton.

Income Tax Collections

A total of \$157,000 persons paid income tax during the fiscal year ended March 31st, 1929, and the sum collected was \$38,422,325.25, the largest amount yet gathered in by the Federal authorities. In 1928 there were 215,277 taxpayers who paid in \$505,197,961.57.

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, insulates the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

R.M. of Mantario

Meeting of Monday, May 13th,
1930, at Orange Hall, Cuthbert.
Present: Reeva Austrum and
a full council.

The minutes of the previous
meeting were read and ap-
proved on motion of Cn. Rich-
ards. Treasurer's monthly re-
port accepted and filed on mo-
tion of Cn. Dahl.

Batty—That a vote of thanks
be tendered the Council of the
town of Albers for their co-
operation and prompt action
in dealing with the boundary
road between R.M. Milton 292
and R.M. Mantario 262.

Dahl—That the following re-
solutions be adopted:

10 a.m. Minutes of previous
meeting; monthly financial
statement.

10.30 a.m. Report of commit-
tees.

10.45 The Council will go into
committee of the whole and
correspondence on file will be
read and discussed. The finance
committee will examine
accounts presented.

12 noon. Adjournment for
luncheon.

1 p.m. Receive deputations
or rate-payers having business
with the Council.

"As far as the army is concerned,
the horse will be a museum
piece within the next 20 years,"
said Brig-General W. B. M. King,
recent arrival on S.S. Duquesne
of York, after a trip during which he
inspected military units of the
British Army. General King added that
the mechanization of the army was
taking rapid strides and, though
a costly operation, would pay for
itself by decreased maintenance
charges within a period of five
years.

New Brunswick has an estimated
population of 439,000, according
to the twelfth annual report
of the chief medical officer of the
provincial department of health
tabled in the Legislature recently.
An interesting detail of the report
was the statement that during the
past year more than 25,000 persons
had been permanently immunized
against diphtheria.

Cn. Batty and Hawtin be a
committee to interview the Ac-
adia M.D. re road into Empress
at their next meeting. If that
meeting is on the first Monday
in the month the meeting of
R.M. Mantario be held on the
first Tuesday.

Richards—Complaints having
been made that stock is still
running at large, the Secretary
is instructed to advise all rate-
payers that the time for open
herd law expired April 15th and
that stock must be taken up.

Dahl—That the following
lands have reverted to the
Crown, the taxes thereon be
cancelled:

1028 N.W. 3.20.27, w. 3, Mun.
5282, Public Revenue, 4.55.
N.W. 29.25.27 w. 8, Sup. Rev.
1.72. S.E. 32.27.27 w. 8, Mun.
10.73; Public Revenue, 1.71.
